- The committee continued working on a reunification plan using the Standard Reunification Protocol provided by the Texas School Safety Center. The committee reviewed:
 - Primary and secondary locations for each of our five campuses,
 - The possibility of transporting students in the event the reunification site was a considerable distance from the campus,
 - Internal and external communication,
 - Staff responsibilities,
 - How to best reunite students with parents,
 - Supplies to facilitate reunification,
 - Medical, counseling and special needs,
 - Food and water
 - Reunification maps
- The committee begin working on the traffic flows around specific campuses using site maps.
- Our plan is to devise a plan for a single campus, walk through that plan with staff, and adjust the plan based on feedback. We can use that knowledge to develop plans for the other sites.
- The meeting was adjourned at 2:30.
